PROFILE SUMMARY

Frontend-focused Software Engineer with 3+ years at Zensar Technologies, specialising in building and revamping scalable, performant web interfaces using React.js, TypeScript, Zustand, TanStack Query, and Material UI. Delivered a 90%+ load time improvement by migrating a legacy platform to a modern stack with code splitting and optimised bundle architecture. Proven track record integrating RESTful APIs, collaborating cross-functionally, and shipping high-quality consumer-facing features. Eager to bring this performance-first mindset high-scale customer platform.

TECHNICAL SKILLS

Frontend	React.js, Next.js (learning), TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite.js, Stencil.js
UI Libraries	Material UI, Reactstrap, Bootstrap, Framer Motion
State Mgmt	Zustand, React Hooks, Context API, TanStack Query (React Query)
Forms & Validation	Zod, TanStack Form, React Hook Form
APIs & Perf	RESTful APIs, Axios, Code Splitting, Bundle Optimisation, Browser DevTools, Responsive Design
Testing	Jest, JUnit, Mockito
Backend	Node.js, Spring Boot, Java, Python, MySQL
Tools	Git, GitHub, Azure DevOps, VS Code, Postman, JIRA

WORK EXPERIENCE

Software Developer | **Zensar Technologies** · Pune

Nov 2022 – Present

Wellstat.IO Platform — Legacy Migration & Documentation

- Reverse-engineered and documented 14 critical React.js and Node.js components, reducing onboarding time for new team members and enabling faster feature delivery.
- Led the migration of a legacy platform to a redesigned UI/UX as a Full-Stack Developer, improving performance and user experience across key consumer touchpoints.

AI Engineering Buddy — Full Frontend Revamp (React · TypeScript · MUI · Zustand · TanStack)

- Owned end-to-end frontend migration of the AI Engineering Buddy platform from a legacy stack to a modern React + TypeScript architecture, reducing initial load time from 30 seconds to 5 seconds — a **90%+ performance improvement**.
- Implemented code splitting and lazy loading across all major modules, significantly reducing bundle size and eliminating unnecessary code overload from the initial payload.
- Rebuilt the entire UI layer using Material UI v5, Framer Motion for animations, and Zod + TanStack Form for robust, type-safe form validation across the platform.
- Replaced ad-hoc data fetching with TanStack Query (React Query) for server state management, and Zustand for client-side global state — eliminating redundant API calls and improving UI consistency.
- Enforced TypeScript strict mode across the revamped codebase, reducing runtime errors and improving developer experience and maintainability.

AI Engineering Buddy — Initial Build (GEN AI Productivity Platform)

- Architected and built dynamic, responsive front-end interfaces using ReactJS, Material UI, Reactstrap, and Vite.js for a productivity platform featuring code migration, code analysis, and diagram generation.

- ▶ Integrated complex RESTful APIs from Spring Boot microservices into the React frontend, implementing state management with hooks and ensuring smooth data flows across the application.
- ▶ Optimised component re-renders and asset loading, contributing to a performant and reliable user experience — platform was showcased at the ISG AI Impact Summit 2024 in London.

Gen AI Chat Application — Cisco (Client Project)

- ▶ Built an interactive plugin chatbot using Stencil.js with advanced web component architecture, enabling seamless embedding across Cisco's web ecosystem.
- ▶ Developed functional, high-performance Cisco web pages using Node.js, blending dynamic and static data rendering for efficient delivery to end users.
- ▶ Collaborated closely with designers, product managers, and backend engineers to ship features on schedule in an agile environment.

ACHIEVEMENTS

- ▶ **RPG Innovation Award** — Recognised for pioneering advancements in Generative AI with the AI Engineering Buddy platform at Zensar Technologies.
- ▶ **ISG AI Impact Summit 2024** — Contributed to the AI Engineering Buddy solution showcased at the international summit in London.
- ▶ **Ace Alliance Team Award** — Awarded for exceptional performance during training project at Zensar Technologies.

EDUCATION

B.E — Computer Science & Engineering

SJB Institute of Technology, Bangalore, Karnataka

Sep 2018 – Aug 2022
